

Steersman High-Performance Headless Ecommerce Suite for Odoo

Get best-in-the-world ecommerce performance and technical SEO for your Odoo ERP for an edge in organic search ranking and user experience.

Manage your Website and Catalog in Odoo

- Configure product availability statuses, select products to publish, manage categories and filters, blog posts, landing pages, and more – all in Odoo
- Select your shipping methods and price tiers (pricelists) available for the website
- Out-of-box support for catalogs with 1,000,000+ products and variants

PIM Application to Organize Your Data

- Manage products and images, along with descriptions, meta data, URL slugs for SEO, and other data for user convenience and SEO
- Allows editing product attributes in bulk to ensure data consistency
- Create product attribute maps to give your online customers clean faceted filters

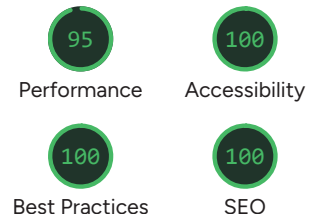

Easy Customer Support from Odoo

- Customer shopping carts are added live as quotes in Odoo – allow your support reps to find quotes and help clients right through Odoo's Sales app – modify cart content, give special prices, and more
- Customer orders become Odoo Sale Orders with deposits (or on Net terms), and deposits can be applied towards multiple invoices if more than one delivery is needed

Lightning-Fast Page Loading and SEO

- All pages are built for fast performance – no other storefronts load as fast
- Users get search and filter results in a fraction of a second, regardless of how large your catalog is
- Schema with structured data, meta data, and other SEO auto applied with an ability to override

 Google Lighthouse Audit Scores

Robust Security and Active Protection

- The website runs as a microservice on separate hardware – website DDoS and other attacks don't slow down your Odoo
- Steersman monitors all websites and Odoo instances and takes mitigation measures in cases of advanced attacks

Steersman's PIM and CMS for Odoo are included in our subscription-based Odoo services
