Steersman B2B Retail Chain Suite for Odoo

Get a single software suite to take store walk-in, phone, and ecommerce orders, route deliveries and pickups, collect funds, track multi-location inventory, control sales taxes, and manage your entire catalog.

Consolidated Sales Order Management

- POS, phone, email, and ecommerce orders are stored and processed in the same way
- Process immediate pickup, will call, and delivery orders in one place, and charge them all together

Advanced pickup and delivery routing

- Take a single order with items for customer pickup and delivery from multiple stores
- Queue showroom pickups, dock pickups, will-calls, parcel and truck deliveries for easy prioritization, with no risk of double-picking

Manage Workstations for Sales and Shipping

- Configure your workstations with pre-set barcode label, shipping label, and document printers, card-charging terminals and allowed payment acquirers

Megastore for Odoo

- High-performance ecommerce store for Odoo with an advanced built-in PIM
- Supports up to a million products and more, with the best-in-the-world page loading speed and technical SEO for an edge in organic search rankings

Improve your Team's Performance

- EDI support for accepting and sending orders, shipping notifications, invoices and other
- TaxJar integration for tax lookups, with optional reporting, configurable by state or country
- Pricing Engine for advanced pricing logic with formulas for customers, customer groups, and product selection, with sliding margins based on product accounting costs, replacement costs, manual cost values, or component costs

Steersman's B2B retail chain suite for Odoo is included in our subscription-based Odoo services
